

# GEOFENCING

Assure Fast and Precise Response

## OVERVIEW

Each year, over 240 million calls are placed with 911 dispatchers across the country. Nearly 80 percent of those calls are made from a cell phone. With the Vocal IP's Next Gen 911 cellular notification solution, security teams will be alerted when a 911 call is dialed from a cell phone located within defined property boundaries. We establish a geofence of the property and submit it to emergency services database. Detailed notifications with time of the call and location of the caller are sent via SMS/E-mail in real-time using location services data.

## BENEFITS

- 
**Instant Alerts**  
 Security personnel and emergency responders can immediately respond to the situation
- 
**Fast Response**  
 Local security and emergency teams can arrive ahead of public services to promptly mitigate or provide assistance
- 
**Threat and Loss Mitigation**  
 Minimize response time to location to ensure that personnel and visitors remain safe in critical situations
- 
**Post-Emergency Analysis**  
 Geofencing data helps assess response times, identify areas of improvement, and refine emergency plans
- 
**Anonymity and Privacy**  
 Enterprise alerts do not contain the phone number or other personal information of the caller

## FEATURES

<b>Perimeter</b>
<ul style="list-style-type: none"> <li>✓ Virtual Boundaries: geofencing allows the creation of virtual boundaries or perimeters around specific locations or areas</li> <li>✓ Real-time Monitoring: monitor and track the movement of individuals within the designated boundaries during a live 911 call</li> </ul>
<b>Additional Settings</b>
<ul style="list-style-type: none"> <li>✓ Targeted Notifications: geofencing enables emergency management teams to send targeted notifications to individuals within a specific geographic area, ensuring timely and relevant information reaches those affected</li> <li>✓ Integration: geofencing can integrate with various technologies such as GPS in mobile devices for accurate tracking and monitoring</li> </ul>

## BEST FOR

<b>Education</b>		
✓ K-12 School Safety	✓ Higher Education Campus Safety	
<b>Enterprise</b>		
✓ Airports	✓ Malls & Retail	
✓ Manufacturing	✓ Refineries	
<b>Public Venues</b>		
✓ Amusement Parks	✓ Beaches	✓ Arenas & Stadiums
✓ Parks	✓ Ski Resorts	✓ Golf Courses
<b>Medical Facilities</b>		
✓ Assisted Living	✓ Clinics	✓ Hospitals
<b>Government Facilities</b>		
✓ Local	✓ State	✓ Federal
<b>Resorts</b>		
✓ Casinos	✓ Convention Centers	
✓ Destination Resorts	✓ Hotels
